

QGIS Application - Feature request #14284

Add new group in Layers Panel above selected layer

2016-02-12 04:07 AM - Bernd Vogelgesang

Status:	Open	Resolution: Copied to github as #: 22278
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>New groups are always created at the end of the layer list.</p> <p>It would be more convenient when they were entered above the selected layer, cause it's more likely that users would like to create it there and not at the very end of the list.</p> <p>Current version: 2.12.3</p>
