Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11489

Description

Systen Info: Windows XP Professional V: 2002 SP3 Machine: Toshiba T9400 @ 2.53GHz 2.99 GB RAM, Graphics: NVIDIA Quadro NVS 150M.

Qgis crashes systematically when trying to access the Properties of Vector Layers, independently of the method used (double click or right click over layer name). This issue does not happen with Raster Layers. Issue persists independently of re-installation of Qgis.

History

Try to reproduce with 1.0 preview 2 from http://download.qgis.org/downloads.rhtml and post the result here.

#2 - 2009-01-19 09:56 AM - Paolo Cavallini

- Resolution set to fixed

- Status changed from Open to Closed

Seems a local, temporary problem.

Please reopen it if it still applies to a recent version
