<b>Description</b>  Add a layer and open layer properties dialog, Style tab you'll remark that the "Control feature rendering order" option at the bottom of the dialog is already checked though no expression is set (see issue #14274). Set an expression and apply. Close the dialog Reopen the dialog : the "Control feature rendering order" option is now unchecked, and the expression set is greyed.  User is confused : Is the rendering order option still active or not?
