Description When a layer is duplicated any joins defined for that layer are also duplicated. This can be replicated as follows: <ol style="list-style-type: none">1. Create a Join via Layer Properties > Joins2. Right-click on the Layer in the Table of Contents and select Duplicate from the context-sensitive menu3. Open Layer Properties > Joins for the duplicated layer and the join appears twice

- % Done changed from 0 to 100
- Pull Request or Patch supplied changed from No to Yes
- Assignee set to Sebastian Dietrich
- Status changed from Open to In Progress

Duplicating vector joins was introduced by

- commit:9ed180303c8f4172c9c6155e9cb226f79fc734b4 (#8243)
- and **again** by commit:57b5eb954ef988489456fcd14b236bb784d150a2 (#14191, which was not about joins at all)

See [PR 2816](#) for a solution.

#3 - 2016-02-20 02:38 AM - Sebastian Dietrich

- *Target version set to Version 2.14*
- *Priority changed from Normal to Severe/Regression*

Flagging this as *Blocker* because it is a regression from 2.12

#4 - 2016-02-20 02:39 AM - Anonymous

- *Status changed from In Progress to Closed*

Fixed in changeset commit:"0c0d72bb0356f078807eefcc02f81e2e4e6585bf".
