That server is not correctly configured. If you administrate that server which seems to be Mapserver, add proper extents to the mapfile.

<http://37.139.6.183/cgi-bin/mapserv?map=/home/dr/wfs/wfs.map&service=wfs&version=1.0.0&request=getcapabilities>

```
<FeatureType>
<Name>points</Name>
<Title>Точки</Title>
<SRS>EPSG:4326</SRS>
<LatLongBoundingBox minx="-180" miny="-180" maxx="180" maxy="180"/>
</FeatureType>
```

Service itself works but I can't recommend how to make QGIS more robust against badly configured services.
