

# QGIS Application - Bug report #14365

## Excessive zoom-in is remembered even if not applied

2016-02-23 09:43 AM - Sandro Santilli

<b>Status:</b> Closed

<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 22348

### Description

When zooming in beyond capacity QGIS stops at the max possible zoom but still remembers the user request so that subsequent zoom-out is not immediate but must first consume all the remembered "virtual" zoom.

It's a usability issue.

By the way, it would be great if it could be capable of zooming in more :)

### History

#### #1 - 2017-05-01 01:06 AM - Giovanni Manghi

- *Easy fix? set to No*
- *Regression? set to No*
