**Description**

While zooming in hard for debugging [https://trac.osgeo.org/postgis/ticket/3464](https://trac.osgeo.org/postgis/ticket/3464) (with TopoViewer), got fp exception on rendering: Core was generated by `output/bin/qgis`. Program terminated with signal SIGFPE, Arithmetic exception.

```c

```

Additional notes:

- The crash occurred due to a floating point exception.
- The error was triggered while zooming in for debugging purposes.
- The issue was linked to the TopoViewer plugin.
- The crash was reproducible, and the code was generated by the application output/bin/qgis.

**Revision 31c788d7 - 2016-02-25 05:14 AM - Martin Dobias**

Fix rendering crash in debug mode (fixes #14369)

Introduced in b6de1971 due to the use of static variables in a function that is called from multiple threads.

Further changes to logging:
- also works when sequential rendering is used
- also works in release mode (to allow checking of rendering speed in normal QGIS release)

**History**

**#1 - 2016-02-24 08:23 PM - Martin Dobias**

- Status changed from Open to Closed

Fixed in changeset commit:"31c788d7f7c4ebacb06c06b93cd3ba599e2fa29b8".
