

QGIS Application - Bug report #14371

QGIS Locks All Files Within a Folder

2016-02-24 07:49 AM - Mark Schulz

Status: Closed	
Priority: High	
Assignee:	
Category: Data Provider/OGR	
Affected QGIS version: 2.8.5	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 22354

Description

QGIS appears to lock all the files within a folder even though it is accessing only a subset of the files.

I created a new text file within a folder where QGIS is accessing a raster. Once the text file is created, I can no longer edit it. This is true of other GIS files that QGIS is not accessing.

Version is 2.8.6 but I cannot select that below

- Status changed from Open to Feedback

I tried with a .txt file and a GeoTIFF file and didn't hit that issue with QGIS 2.16.3 on Win7. Could you try to create a new directory and check what is the minimum content to reproduce the issue ? (and provide the data and steps you applied)

#3 - 2016-10-08 01:09 PM - Mark Schulz

I now have 2.14.6 installed and the issue no longer exists so it must have been fixed somewhere along the line.

Thanks
