QGIS Application - Bug report #14403

Processing toolbox was not updated on 2.14 release as mentioned

2016-03-02 06:55 AM - Almerio Moreira

Status: Rejected Priority: Normal

Assignee:

Category: Unknown

Affected QGIS version: 2.14.0 Regression: No
Operating System: Easy fix?: No
Pull Request or Patch shapplied: Resolution: invalid

Pull Request or Patch shapplied:

Crashes QGIS or corrupts data:

Resolution: invalid

Copied to github as #: 22384

Description

I did the advanced Install, I have tried Desktop Express Install.

Many new features was not updated as mentioned in the [http://qgis.org/en/site/forusers/visualchangelog214/#processing] like:

1) Feature: New algorithms in 2.14 QGIS geoalgorithms:

Smooth: for smoothing line or polygon layers.

Reverse line direction.

2) Feature: Improved toolbox

The simplified interface has been removed, and a new and more user-friendly system of managing providers has been added. The algorithm search functionality now searches also in providers that are not active, and suggests activating them.

3) Feature: More informative algorithm dialog

A short description is now shown along with the algorithm parameters, making it easy to understand the purpose of the algorithm.

Are you sure you do not have an older copy installed in your ~/.qgis2?

#2 - 2016-03-02 07:26 AM - Almerio Moreira

I am really sorry, that's was the problem.

I had an older copy installed on my ~/.qgis2

I have just deleted and reopened and now it's all fine.

Many thanks.
