QGIS Application - Bug report #14434
QGIS icon blurry in Quick Application Switch view (Command-TAB)

2016-03-06 08:45 AM - Josiah Wahlrab

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	OsX UI			
Affected QGIS version:	2.14.0		**Regression?:**	No
Operating System:	Mac OSX		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:			**Copied to github as #:**	22413

Description

When using the key combination Command-TAB (or ⌘-TAB) to *quick switch* between opened applications, the QGIS icon appears blurry on Macbook Pro retina laptop (please attached screenshot). Also, the QGIS icon in the dock appears to be blurry. However, the QIGS application icon in the actual Applications folders looks fine.
