

QGIS Application - Feature request #14475

Processing GRASS should support other file formats than Shapefile

2016-03-13 09:02 AM - Médéric RIBREUX

Status:	Closed	
Priority:	Normal	
Assignee:	Médéric RIBREUX	
Category:	Processing/GRASS	
Pull Request or Patch supplied:	Yes	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 22453

Description

For the moment, when you use GRASS algorithms, you can only export to shapefiles.
Other Processing algorithms (QGIS ones for example) support the following formats:

- SHP
- DXF
- ODS
- GXT
- XLSX
- GML
- GEOJSON
- GPKG
- TAB
- CSV
- ITF
- XML
- DGN
- BNA
- KML
- GPX
- SQLite
- ITF
- 000

GRASS algorithms should support those formats too.
The file selector should be the same than for the other Processing algorithms (where you can select the file format).

History

#1 - 2016-03-16 01:17 AM - R. R.

For some GRASS GIS 7 commands (e.g. v.overlay) a 'Modify input layer' option may be helpful.

#2 - 2017-05-01 12:46 AM - Giovanni Manghi

- Easy fix? set to No

#3 - 2017-11-28 07:58 AM - Alexander Bruy

- Description updated

- Status changed from Open to In Progress

- Pull Request or Patch supplied changed from No to Yes

Pull-request <https://github.com/qgis/QGIS/pull/5726>

#4 - 2018-05-16 12:55 PM - Alexander Bruy

- *Resolution set to fixed/implemented*
- *Status changed from In Progress to Closed*

Fixed in master.
