

QGIS Application - Bug report #14497

Atlas and Virtual Layers

2016-03-15 09:16 AM - Klas Karlsson

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 22472
Description		
<p>I cant get the Atlas to work with virtual layers.</p> <p>My procedure may be at fault...</p> <p>1. Vector polygon layer (SHAPE) with "Provider feature filter" on an attribute to get only 'city'</p> <p>2. Virtual Layer to get only "large" polygons.</p> <p><i>select * from layername where st_area(geometry) > 10000000;</i></p> <p>3. Use virtual layer as source for Atlas.</p> <p>Variables like @atlas_pagename works fine as do the drop-down list to select pages, but the map will not update.</p> <p>If I save the virtual layer as a new shape file and use that in the Atlas, it also works fine!</p> <p>I've even tried creating a very simple shape file and use <i>select * from layername</i> and it will not work.</p>		

History

#1 - 2016-04-09 10:10 AM - Giovanni Manghi

- Operating System deleted (linux and windows)
- Priority changed from Low to Normal
- Status changed from Open to Feedback
- Category set to Map Composer/Printing

Please attach a sample project together with the necessary data.

#2 - 2016-05-23 05:34 AM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Feedback to Closed

closing for lack of feedback, please reopen if necessary.
