QGIS Application - Bug report #14498
not corectly working spatial join

2016-03-15 09:25 AM - alzbeta gardonova

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Vectors		
Affected QGIS version:	2.8.7	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22473

Description

I try to make join attribute by location of two polygon layers. I want to ad maximum of attribute index to target layer. When I define "take summary of intersecting features" and choose MAX, then i tried both of output table settings, but the output shapefile has only atttribute COUNT.
I try to set also another statistics (MEAN, MIN,...) but still only COUNT was in output shapefile.
I did the same month ago on 2.8.1 and everything was ok, today I try to do the same, but there is this problem
