QGIS Application - Bug report #14514
QGIS master forgets network cache settings

2016-03-16 01:10 PM - Darek Bobak

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Network			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	22487	

Description

1. Set custom directory and its size for wms cache (Settings -> Options -> Network -> Cache settings)
2. Confirm changes by clicking OK
3. Reopen Options
4. QGIS forgets the settings. The "Directory" text field remains empty; "Size [KiB]" is always 51200.

It is not possible to make this changes by "Advanced" section in Options as well as directly in Windows registry

Is master version 2.14? If so It is saving my changes, both size and cache directory.

Windows 7 (x64) and QGIS 2.14 (x64)

- Status changed from Closed to Reopened

In latest QGIS Master (f1ec121, just installed with OSGeo4W installer) the bug still exists.
Platform: Windows 10 Pro x64.

That build doesn't yet include the fix. You'll need to wait for a newer build.
