

QGIS Application - Feature request #14571

Showing only the first 100 rows from attribute table

2016-03-25 03:34 AM - Sylvain M.

Status:	Open	Resolution: Copied to github as #: 22544
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>When we are working with voluminous dataset, and we need to have a look on attribute data (fields and data), we are obligated to open the whole dataset, and this can take a long time.</p> <p>Although, frequently we only need to look an echantillon of datas, not the whole dataset.</p> <p>That's why, for example, PostgreSQL have a fonction to show only the first 100 rows of a table.</p> <p>I think this function would be very useful in QGis too (on right click on the layer).</p>

- *Easy fix? set to No*

#2 - 2018-01-15 01:12 PM - Sylvain M.

Since 2 years that I made this request, I had very many times this need to display only the first entities of large attributes tables.

Is there any hope that this feature is supported with QGis 3?

#3 - 2018-01-15 08:37 PM - Nyal Dawson

- *Description updated*

No, it's not implemented in QGIS 3.0
