Description

1. load a GRASS vector map

2. edit it's table content, e.g. in QGIS GRASS shell, external GRASS session, OO.org Calc

3. check the table content in QGIS table editor - whatever changes you made, they are not visible here

We could add a "Refresh" button to the table visualization.

Feedback?

This is the same beahviour as for others layers (eg you can edit the dbf of a shapefile, with the same problems). Without a locking mechanism (difficult or impossible to implement, given the veriety of data sources available), the problem will always be present.

+1

this would also "fix" #1631 and #1659

#4 - 2009-07-28 06:53 AM - Lorenzo Masini

- Status changed from Open to In Progress

Ok, I'm going to "fix" it soon :D

Hello, bug triage...

with the following PR, there should be a button to refresh attribute table.

Waiting to test it in nightly builds...
