Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 22559
Description		
<p>I have have a map tool in a plugin to select by rectangle. I'd like to send the rectangle to several different layers to select features with a signal.</p> <p>This is the method I'd like changed to a slot.</p> <pre>void QgsVectorLayer::select(QgsRectangle & rect, bool addToSelection)</pre> <p>The other "select" methods for QgsVectorLayer are already slots.</p>
