

QGIS Application - Bug report #14599

Processing guidelines for help files is outdated

2016-03-31 10:16 AM - matteo ghetta

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Documentation and Help	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22567
Description		
<p>Here the link of the official webpage</p> <p>http://docs.qgis.org/2.8/en/docs/documentation_guidelines/README.html#documenting-processing-algorithms</p> <p>some points are outdated:</p> <ul style="list-style-type: none">- SAGA help files are not available anymore- it is quite difficult for a potential doc writer to understand where the files are located- QGIS algs have .yaml syntax- maybe it is worth to have a standard template for all the providers (at the moment gdal/ogr points to their own docs, SAGA are missing, GRASS and TauDEM have their own..)		

History

#1 - 2016-08-17 09:33 AM - Harrissou Santanna

I was about closing this one but rather simply made a copy at <https://github.com/qgis/QGIS-Documentation/issues/1308> (because not really clear/sure whether processing algs documentation should be in the user manual or in the application)

#2 - 2017-04-27 07:03 AM - Alexander Bruy

- Status changed from Open to Closed

Issue moved to the documentation bugtracker
