

QGIS Application - Bug report #14612

Error running Dissolve

2016-04-03 10:31 PM - Magnus Nilsson

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/QGIS	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:	Ubuntu 14.04 LTS	Easy fix?: No
Pull Request or Patch submitted:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22578
Description		
<p>Hi</p> <p>When I run Dissolve in Processing I get this error:</p> <p>local variable 'nElement' referenced before assignment See log for more details</p> <p>It is a rather simple polyon layer, no features selected. I have selected a field for the dissolve. When I dissolve the whole layer, this error does not occur. Has anyone else noticed this error?</p> <p>Win 7 64 bit QGIS 2.14.0 64 bit</p> <p>Regards,</p> <p>Magnus</p>

Be sure to use the latest version of the Processing plugin. By looking at the code this error is impossible to happen. Also no one responded to your first mail on the list, so it seems this problem is exclusive to you, which makes me assume it is related to your installation of the plugin.

- Status changed from Open to Feedback

Not reproducible with Processing shipped with QGIS master and 2.14. Looks like you have Processing plugin installed from Plugin repository in your user directory. Please remove it and check again.

#3 - 2016-04-04 01:32 AM - Magnus Nilsson

Not sure of might have gone wrong during installation. I don't have admin rights on the computer, so our IT department installed it (standalone installer). I have not installed any plugins after that (due to no admin rights). What should I have done differently during installation?

#4 - 2016-04-06 05:00 AM - Alexander Bruy

Installing plugin does not require admon rights.

Please check if you have Processing in your user directory and if it is here — remove it.

#5 - 2016-04-06 06:23 AM - Magnus Nilsson

I removed the processing folder from C:\\Users\\user\\.qgis2 and it works again. Thank you.
