

QGIS Application - Bug report #14616

GDAL does not take care of Proxy settings

2016-04-05 07:44 AM - Marco Lechner

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 22582
Description When behind a Proxy (Options -> Network -> Use proxy for web access) the QGIS Proxy settings do not work (or are ignored) by GDAL. This leads to not being able to load GDAL_WMS layers [http://www.gdal.org/frmt_wms.html] when behind a Proxy while other QGIS-Functions (WMS, ...) respect the Proxy settings. loading of a layer takes a long time while QGIS is waiting for timeout of GDAL-provider.
