

# QGIS Application - Bug report #14616

## GDAL does not take care of Proxy settings

2016-04-05 07:44 AM - Marco Lechner

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Data Provider	
<b>Affected QGIS version:</b> 2.14.0	<b>Regression?:</b> No
<b>Operating System:</b> Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 22582
<b>Description</b>	
<p>When behind a Proxy (Options -&gt; Network -&gt; Use proxy for web access) the QGIS Proxy settings do not work (or are ignored) by GDAL. This leads to not being able to load GDAL_WMS layers [<a href="http://www.gdal.org/frmt_wms.html">http://www.gdal.org/frmt_wms.html</a>] when behind a Proxy while other QGIS-Functions (WMS, ...) respect the Proxy settings. loading of a layer takes a long time while QGIS is waiting for timeout of GDAL-provider.</p>
