

QGIS Application - Feature request #1465 plugin installer fails

2008-12-17 01:57 PM - Gerhard Spieles

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: C++ Plugins	
Pull Request or Patch supplied:	Resolution: invalid
Easy fix?: No	Copied to github as #: 11525
Description	
<p>QGIS shows, that a plugin update from repository is available. Installing any upgrade terminate with a message-box contains:</p> <p>"Failed to unzip the plugin package. Probably it's broken or missing from the repository. You may also want to make sure that you have write permission to the plugin directory: C:/Dokumente und Einstellungen/Gerhard/.qgis/python/plugins"</p> <p>I'm sure, that write-permission to the plugin directory is set.</p>	

History

#1 - 2008-12-18 04:49 AM - Borys Jurgiel

- Resolution set to *invalid*
- Status changed from *Open* to *Closed*

The problem (I hope temporary) is in the main repository, not in Installer. Plugins from the other repositories are still available. I've set it to invalid because Installer is being switched to new main repositories in these days.
