

QGIS Application - Bug report #14654

Qgis 2.14 - Processing, Additional Providers is broken. Missing msys directory.

2016-04-10 02:47 AM - Dan G

Status:	Closed		
Priority:	Normal		
Assignee:	Victor Olaya		
Category:	Processing/Core		
Affected QGIS version:	2.14.3	Regression?:	No
Operating System:	MS Windows	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	22618
Description			
<p>Hello</p> <p>I have installed Qgis 2.14 using "QGIS Standalone Installer Version 2.14 (64 bit)" onto fresh, clean Windows 7 64-bit installations.</p> <p>After Qgis has been installed 'Additional Providers' in the Processing Toolbox is broken, I get an error message that the path "C:/PROGRA~1/QGIS~1/apps\\msys" does not exist.</p> <p>As a result of this it is not possible to activate additional geocalgorithms, such as 'Tools for LiDAR data' for example.</p> <p>I have tested with both qgis 2.14.0 and 2.14.1.</p> <p>During the installation of qgis I have tested with both the default installation path (C:\\Program Files\\Qgis Essen) and a simpler path like "C:\\qgis_essen" but the error persists regardless.</p> <p>I will attach some screenshots.</p>

- Status changed from Open to Closed
- Resolution set to duplicate

duplicate of #14431

#2 - 2016-05-10 11:16 AM - Dan G

- Status changed from Closed to Reopened

This issue still persists with latest Qgis 2.14.2.

After Qgis has been installed 'Additional Providers' in the Processing Toolbox is broken, I get an error message that the path "C:/PROGRA~1/QGIS~1/apps\\msys" does not exist.

#3 - 2016-05-24 10:41 PM - Alexander Bruy

- Status changed from Reopened to Feedback
- Category changed from Windows Package to Processing/Core

Please test with completely clean system (no old registry entries, empty ~/.qgis2)

#4 - 2016-06-12 06:10 AM - Dan G

This issue still persists with latest Qgis 2.14.3.
Yes, testing is performed on fresh, clean Windows 7 64-bit installations.

After Qgis has been installed, opening 'Processing options' gives an error message that the path "C:/PROGRA~1/QGIS~1/apps\\msys" does not exist.
(Error message is received when pressing the 'OK'-button for example.)

#5 - 2016-07-03 07:26 AM - Giovanni Manghi

- Status changed from Feedback to Open
- Assignee set to Victor Olaya
- Resolution deleted (duplicate)
- Affected QGIS version changed from 2.14.1 to 2.14.3

Still true with the 2.14.3 standalone installer on a completely clean environment. Not sure it has been fixed in master of the dev branch of 2.14.

#6 - 2016-08-05 05:07 AM - Alexander Bruy

- Status changed from Open to Feedback

Should be fixed in latest point release

#7 - 2016-08-23 06:51 AM - Alexander Bruy

- Status changed from Feedback to Closed

Please reopen in necessary
