<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 11526
<b>Description</b>	
<p>After opening a project file that contains print composer settings, a composer map with preview type 'cash' has not appropriate resolution. I think the problem is that when the composer map is read from xml file, the composer is not yet visible. It needs a workaround that creates the preview image later.</p>
