

QGIS Application - Bug report #14660

Check Geometries plugin: 'When a row is selected, move to: Error' shows blank canvas

2016-04-11 01:13 PM - R. R.

Status: Closed	
Priority: Normal	
Assignee: Sandro Mani	
Category: C++ plugins/Geometry Checker	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 22624
Description	
<p>In some cases the 'When a row is select, move to: Error' option doesn't show any features. I've uploaded sample geometries and a .mp4 screencast with the steps taken to reproduce the issue.</p>	

History

#1 - 2016-04-19 12:36 AM - Sandro Mani

The issue is that the area of the feature is so small that the centroid computation code suffers from numerical instabilities. On my todo list, as soon as I find some time.

#2 - 2016-06-02 12:50 AM - Sandro Mani

- Status changed from Open to Closed

A fix for this has landed, see commit:857d544
