Affected QGIS version:	2.14.0	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22635

Description

I'm using 2.14.0 on a Windows 10 machine.

I have created an atlas map with features numbered 1-6 using field "panel_nbr". I have set the sort in Atlas configuration to the same field (panel_nbr). When I preview the atlas maps they are given in apparently random order. It's not sorted properly, nor is the order given based on which feature was created first.

Can you please confirm the field type for the "panel_nbr" field?

#2 - 2016-04-13 06:29 AM - Spencer Gardner

Field type is integer

#3 - 2016-04-13 06:29 AM - Spencer Gardner

I should also add that I just upgraded to 2.14.1 and the issue still occurs.

I have tried with a String Field, and it run.

But i have the same problem with 2.14.1 on a Windows 7 machine for a Integer64 Field... <=> In my memories, it was OK with previous versions of QGIS 2.12...
