Description

Hi, I am unable to run Python codes as when I press "Browse" the following appears (see below).

This happens in all QGIS modules. I am pulling my hair out. Other fixes have not worked.

Thanks
Benjamin

An error has occurred while executing Python code:

```
TypeError: QgsEncodingFileDialog(QWidget parent=None, QString caption=QString(), QString directory=QString(), QString filter=QString(), QString encoding=QString()): argument 3 has unexpected type 'QPyNullVariant'
```

Traceback (most recent call last):
