

QGIS Application - Bug report #14683

Calling Actions from attribute context menu vs. the Action map tool

2016-04-14 03:26 AM - Jakob Lanstorp

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Actions	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 22647
Description		
<p>When calling an action from the context menu (right click) on an attribute window, the value obtained from a field name does not show.</p> <p>Python action example: print "Value of myattribute: {}".format(['% "myattribute" %']) only prints "Value of myattribute:" not adding the actually value.</p> <p>The same action used from the Action map tool button writes out the field value also as expected.</p> <p>Tested on Windows 7 OSGEO4W QGIS version 2.14.1 and QGIS master.</p>		

History

#1 - 2016-04-14 03:28 AM - Giovanni Manghi

- Category set to Actions

#2 - 2016-05-27 03:09 AM - Nyal Dawson

- Status changed from Open to Feedback

I can't reproduce on master - can you confirm this bug is still present?

#3 - 2016-05-27 04:17 AM - Jakob Lanstorp

Did a test against OSGEO4W QGIS 2.14.2 where the error is present. Did also a test against QGIS master of today (QGIS code revision: ed1235d) where the error is no more present.

So I guess the issue can be closed now.

#4 - 2016-05-27 05:41 AM - Nyal Dawson

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

#5 - 2016-05-27 05:42 AM - Nyal Dawson

I believe this should also already be fixed in 2.14.3
