<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 22654

#### Description

When using the function v.what.rast.points in a model, the "WHERE conditions of SQL statement without 'where' keyword" is required. This should, however, be an optional parameter, not a requirement.

Note that this is only an issue in modeler, the same function runs fine without that field being filled in from the processing toolbox directly.

#### History

##### #1 - 2016-05-24 09:23 AM - Alexander Bruy

- Status changed from Open to Feedback

Should be fixed in master. Please check.

##### #2 - 2016-06-22 01:09 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Feedback to Closed

closing for lack of feedback, please reopen if necessary.
