QGIS Application - Bug report #14690
Unnecessary requirement in v.what.rast.points function when used in modeler

2016-04-15 12:11 AM - pvanbosgeo -

Status:	Closed			
Priority:	Normal			
Assignee:	Victor Olaya			
Category:	Processing/Modeller			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	worksforme	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22654	

Description

When using the function v.what.rast.points in a model, the "WHERE conditions of SQL statement without 'where' keyword" is required. This should, however, be an optional parameter, not a requirement.

Note that this is only an issue in modeller, the same function runs fine without that field being filled in from the processing toolbox directly.
