Affected QGIS version:2.14.1		Regression?:	No	
Operating Syster	<b>n:</b> Windows	Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:	duplicate	
Crashes QGIS or corru <b>pits</b> data:		Copied to github as #: 22657		
Description		•		

I'm trying to add a drop shadow to an inverted polygon but when I add the drop shadow, the polygon no longer renders inverted - it shows as the normal polygon.

Steps to reproduce: Style a polygon as inverted polygon Activate draw effects and add a drop shadow

What happens:

The polygon renders as a normal polygon with the styling indicated in the inverted polygon styling.

What should happen:

The polygon renders as an inverted polygon with the drop shadow.
