

QGIS Application - Feature request #14738

Add 'Move Point Symbols' Tool

2016-04-27 09:39 AM - R. R.

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:		Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 22696
Description <p>Please add a tool to move point symbol markers (e.g. SVG markers). It should work in the same way as the 'Move label' tool. So far there is no data defined option for X,Y coordinates in the 'Symbol selector' dialog but I suppose the existing 'Offset X,Y' fields will do the job. Please note that a 'Rotate Point Symbols' tool is already implemented in QGIS.</p> <p>My aim is to create dynamic leader lines from the symbol marker offset to the point geometry using the new geometry generator marker:</p> <pre>make_line (make_point(\$x + regexp_substr("offset_xy", '([^\,]*)'), \$y - regexp_substr("offset_xy", '([^\,]*\$)')), \$geometry)</pre> <p>See also http://www.opengis.ch/2015/12/10/geometry-generator-symbology/</p>

[FEATURE] New map tool for interactively setting point symbol offset

Allows for setting a point's offset if it is bound to a field using data defined overrides (fix #14738)

TODO: replace temporary icons

Hi Nyal,

thanks for this feature. The way it's implemented looks really nice.
