

QGIS Application - Bug report #14741

Delete Ring issue

2016-04-28 01:06 PM - Enrico Fiore

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Digitising	
Affected QGIS version:	2.14.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 22699
Description		
<p>Hi,</p> <p>I noticed that "Delete Ring" doesn't work and the hole is not fill up. I played around with snapping options and tolerance, without any effect.</p> <p>I have also add a label with area measure (\$area) and I noticed that when I use "Delete Ring" the area value increases, I suppose because the hole is filled, but in the view the hole remains visible.</p> <p>So I moved the polygon, with Move Features, and the polygon was regenerated without hole.</p> <p>I work in "wgs 84 / utm 32N" and in a 64 bit OS</p>
