QGIS Application - Bug report #14794 Text in svg misaligned in 2.14 composer

2016-05-09 09:58 AM - David Strausz

Status: Closed Priority: Normal

Assignee:

Category: Map Composer/Printing

Affected QGIS version:2.14.0 Regression?: No Operating System: Linux Easy fix?: No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 22751

Description

Starting in version 2.14, an svg that was correctly rendering in previous versions, is now rendering with misplaced text in composer.

I attach a copy of the svg experiencing this issue - NauticalRoseSJ.svg.

This svg was created in Inkscape and saved as a standard svg. It has been working fine in earlier QGIS versions.

I also attach a pdf showing bitmap images of the correct and version 2.14 renderings - QGIS214Render.pdf

Note that the misplaced text is only the text that has been rotated around the rings in the compass rose. The other text seems to be placed as expected.

I noticed this on first upgrading to 2.14.0, and it still persists in current version installed (2.14.2).

Thanks for checking this out.
