

QGIS Application - Bug report #14860

Processing QGIS/create constant layer does not work

2016-05-22 01:49 PM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Victor Olaya	
Category:	Processing/QGIS	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 22813
Description		
I tested all QGIS releases where the Processing/QGIS/raster tool called "create constant layer" is available (on both Linux and Windows) and in all them the tool returns a raster that is all "nan" and an extent that is not the same as the one of the "reference layer". Tagging it as a blocker because is a tool that from its introduction does not seems to have ever worked.
