QGIS Application - Bug report #14903
Unable to query again WMS capabilities on http://localhost

2016-05-26 08:40 AM - Stéphane Brunner

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Unknown			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:		**Copied to github as #:**	22856	

Description

I had many a error on a GetCapabilities on htp://localhost

And now I'm not able to ask to QGIS to make a new query on localhost,
I try to add a query string,
I try to change the path,
I try to restart QGIS,
I try to create a new WMS server
And in none of those case QGIS do a query on localhost...
