Category: Unknown	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 22893
Description	
<p>In qgis we have four options to quickly select objects interactively: select (by pointing or rectangle), select by polygon, select by radius and select freehand. I am desperatly missing a 'select by line' feature/tool, i.e. selecting parcels intersected by a power line or slt.</p>
