

QGIS Application - Bug report #14956

adding QgsRelationEditorWidget crashes Qt Designer

2016-06-04 12:29 PM - Andrew McAninch

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 22905
Description		
<p>On Windows 7, OSGeo4W-64, Qt Designer crashes when I try to add a QgsRelationEditorWidget. I have tested this in the nightly build as well as the 2.14.3 build. Qt Designer with 2.8.9 widgets works fine, but if I open a form built with the LTR in another version of Qt Designer, Designer will crash when I switch to the tab with the relation widget.</p> <p>I briefly tested master on Ubuntu and that crashes QT Designer as well.</p>		

History

#1 - 2016-06-12 05:22 AM - Matthias Kuhn

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Fixed in commit:76bf6e0dc6cf7a1c84a3d0cc4fe7b8c1032e8eb0

#2 - 2016-09-13 07:30 AM - Sandro Santilli

- Target version set to Version 2.16

Should this be (or was it) backported to 2.14 ?
