Affected QGIS version:	3.0.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22922	

Description

The reported issue in #14967 (not showing color wheel nor edit symbol button when single symbol is applied over some renderer styles) concerns also 2.5D renderer. I however notice that if you apply over the 2.5D renderer a categorized style and then switch to single symbol, the color wheel is available.
