After running "make check", some testdata files are overridden:

```sh
# Changes not staged for commit:
# modified:   python/plugins/processing/tests/testdata/custom/grass7/raster_4class.tif.aux.xml
# modified:   python/plugins/processing/tests/testdata/custom/grass7/raster_5class.tif.aux.xml
# modified:   python/plugins/processing/tests/testdata/custom/grass7/raster_6class.tif.aux.xml
```

They should either not be in the repository or not be overridden.
If the test implies modifying them, the tester should first copy them to temporary space and modify them there.

The diffs, for the record:

```sh

I suspect those files should not be in the repository at all?
