Affected QGIS version:	2.14.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22939	

Description

the new feature of QGIS 2.12

https://www.qgis.org/en/site/forusers/visualchangelog212/#feature-data-defined-control-over-map-layers-and-style-presets

do not work if a layer is filtered

History

#1 - 2016-06-10 02:23 AM - Nyall Dawson

What do you mean by "filtered"?

#2 - 2016-06-10 02:51 AM - Alain FERRATON

sorry, for my bad english.

Layer Menu -> Filter...

#3 - 2016-06-13 10:24 PM - Nyall Dawson

- Status changed from Open to Feedback

I need more details - I can't reproduce. Are you referring to the data defined layers or data defined style preset?

Style presets don't save layer subsets, maybe that's what you're seeing?

#4 - 2016-06-15 01:23 AM - Alain FERRATON

sorry, I made a mistake.

the feature works correctly.

A proposal for a new feature:

allow filtering on the features of the layer in the control in mapcomposer with an expression

NameLayer | subset = ...

thanks

- Status changed from Feedback to Closed

- Resolution set to invalid

No problem! Can you file the request in a new ticket (it's a good idea btw)
