

QGIS Application - Bug report #15013

Customization dialog icons look bigger than those usually visible in other widgets

2016-06-12 01:29 PM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: 2.14.3	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 22960
Description	
Size used for icons in customization dialog looks like the same as those in QGIS toolbars and thus, too big, compared to icons in other dialogs

The icon sizes look okay on linux mint. Could you please specify your platform and screen shots will be helpful as well.

- File *customization_icon.PNG* added

Actually, it's not that the icons are wrongly placed in the GUI due to their size. It's just that they look oversized.

Just for consistency, I think the size of these icons should be the same as the one used in the layer panel, the attribute table, the bookmark panel, Browser panel, Statistic Panel...

Only afaics the Advanced Digitizing panel seems to be counter example

I work on windows7, 10 and mac osx 10.9

I think it's correct as it is. The icon sizes are the same as the main window today's, ie canvas and composer. It's just the dock widgets which have smaller toolbar icons.
