| <b>Description</b>  |                                      |
| While "qgis" or "qgis --nocustomization" launches qgis application, typing "qgis --help" at a command prompt does not show the help |                                      |

### History

#### #1 - 2016-06-25 05:44 PM - Larry Shaffer

I believe (can't find docs on this right now) that this stems from Windows not allowing applications to be defined as both GUI and console. This is why you can not also just get DebugInfo output on a Win console launch of QGIS.

This may be able to be overcome (with AllocConsole or AttachConsole Win API calls, though I have not tested):

<http://stackoverflow.com/questions/54536>

#### #2 - 2016-09-17 04:09 PM - Jürgen Fischer

- Resolution set to fixed/implemented
- Status changed from Open to Closed

On windows now a message box is opened on --help. Fixed in commit:a465b0e, commit:8ced780, commit:bd23bf1a and commit:f61c993

#### #3 - 2017-09-22 10:05 AM - Jürgen Fischer

- Category set to Unknown
