

## QGIS Application - Bug report #15027

### actions: activating the action tool via toolbar button fails to select any action

2016-06-14 02:29 AM - Mathieu Pellerin - nIRV

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b>	
<b>Category:</b> Actions	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 22974
<b>Description</b>	
<p>When a single action is defined for a layer, activating the action tool via the toolbar's "Run Feature Action" button should automatically activate that action. The current behavior, which activates no action, is IMO broken behavior.</p>	
<b>Steps to reproduce:</b>	
<ol style="list-style-type: none"><li>1. Launch QGIS</li><li>2. Load a project file containing a layer with a pre-defined action (for the sake of this demonstration, many actions would do too)</li><li>3. Activate that layer</li><li>4. Click on the "Run Feature Action" toolbar button</li><li>5. Click on a feature from that layer, notice no action is happening</li></ol>

Matthias, that was quick :)

I've tested the commit, working like a charm here. Thanks
