#### Description

I half think this is a graphics driver and half way think it isn't. As of Build e301cc8 several panels won't render correctly on Ubuntu 16.04. It seems to be the ones that have the ability to scroll (I think). Right now Statistics, Browser, and Spatial Bookmarks don't seem to be usable even after adding data.

- Resolution set to fixed/implemented
- Status changed from Open to Closed

That build is missing the fixes for this. You'll need to wait for a more recent build
