Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22981

Description

Since this commit:11a5a69, renaming newly-added non-project bookmarks (via double-clicking on the list' name column) fails when bookmark list is empty.

Steps to reproduce

1. Open the bookmarks panel, making sure there are no bookmarks (export your list and clear it temporarily if needed)

2. Add a new bookmark, renamed it

3. Notice the name doesn't stick, reverts to "New bookmark"
