Category: Analysis library	
Affected QGIS version: 2.14.3	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 22986

Description

According to the documentation the speed field has to be numeric. However when you create a virtual field of the numeric type, it is not recognised by the plugin under vector > road graph > settings.

It would be great that this would be possible, because it gives great flexibility in changing parameters to the speed-field. More info: <http://gis.stackexchange.com/questions/198538/road-graph-plugin-routing-on-a-virtual-numeric-field-does-not-work>

Associated revisions

Revision 44112675 - 2016-06-17 04:23 AM - Nyal Dawson

[roadgraph] Allow use of virtual and joined fields (fix #15041)

Also modernise some code
