QGIS Application - Bug report #1508 fTools Geoprocessing Dissolve Crashes QGIS

2009-01-24 01:15 AM - Horst Düster

Status: Closed
Priority: Low
Assignee: cfarmer Category: C++ Plugins

Affected QGIS version:

Operating System: All

Pull Request or Patch supplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: fixed

Copied to github as #: 11568

Description

Use the shape from http://www.sogis1.so.ch/sogis/dl/gempoly.zip for the following steps:

- 1. Load Shape gem_poly.shp
- 2. Select tools->Geoprocessing Tools->dissolve
- 3. Select gem_poly.shp
- 4. Select BZRK_NR as dissolve item
- 5. Define output shape
- 6. Hit OK

=> QGIS Crashes

Tested on two different boxes: [[RadHat]] AS4 and Kubuntu 8.04

History

#1 - 2009-01-24 06:36 AM - cfarmer -

- Status changed from Open to In Progress

Unable to reproduce above crash.

Tested following above steps and provided shapefile using Linux Ubuntu 8.04.

Will attempt with MS Windows XP at a later date.

Unfortunately I can't reproduce it too. But my QGIS crashes always when I try to dissolve the same layer as [[PostGIS]] layer. Try http://www.sogis1.so.ch/sogis/dl/geo_gemeinden.dmp.tar.bz2
