

QGIS Application - Feature request #15084

Show Z value in "Current map coordinate"

2016-06-20 01:58 AM - Francisco Raga

Status:	Open	Resolution: Copied to github as #: 23026
Priority:	Low	
Assignee:		
Category:	Rasters	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Currently the "Current map coordinate" textbox only shows the X and Y values.</p> <p>If the user has loaded a layer with Z values or a MDT, when he passes the cursor over the pixels, it would be great if it shows the 3 values X,Y and Z.</p> <p>if there is no Z value,then show 0.</p>

- Easy fix? set to No

#2 - 2017-05-06 10:58 PM - Regis Haubourg

- Priority changed from Normal to Low

- Category set to Rasters

- Description updated

Hi, there can be many DEM loaded and many Z informations at the same place. What you ask for would require a setting to choose which reference DEM to use. I think this is pretty close to what the "Value Tool" plugin does.

And this to me always raised the question/problem: there are a few 3rd party plugin that are SO fundamental (value tool, group stats and a few others) that is really surprising that the devs always overlooked their implementation into core qgis.
