

## QGIS Application - Feature request #151

### Copying of basic symbology (e.g. colour) to other layers needed

2006-06-18 12:55 AM - anonymous -

|                                                                                                                                                                               |                                     |

| <b>Easy fix?:</b> No                                                                                                                                                          | <b>Copied to github as #:</b> 10210 |
| <b>Description</b>                                                                                                                                                            |                                     |
| Dragging and dropping files between different file groups in the legend works sometimes and doesn't work other times. I can put 2 or 3 files into the one group, but no more. |                                     |

#### History

##### #1 - 2006-07-22 03:04 AM - Gavin Macaulay -

I've worked out why drap and drops seem inconsistent - they only happen if the source layer has the same underlying data structure as the destination. This includes having the same number of fields, the same field names, etc. While I can see the reasoning for this, I'm often just wanting to use drag and drops to make layers all the same colour. Hence this ticket isn't a bug, and I'll turn it into an enhancement for a later version.

Perhaps we need a way to copy 'basic symbology' to other layer files to compliment the current drag and drop which requires very similar layers before it allows a drop.

##### #2 - 2007-07-21 09:04 PM - Tim Sutton

Changed to minor under the following scheme:

- blocker - bugs that should block the release. Since we are going to release pretty much 'come what may' I would like no bugs
- allocated to this category without consultation with me and / or PSC
- critical - bugs that cause the application to crash or corrupt data
- major - application features that do not function at all
- **minor** - features that function but imperfectly e.g. labels placing incorrectly
- trivial - gui useability issues or small issues with the documentation, install notes etc.

##### #3 - 2008-01-08 07:01 AM - Magnus Homann

Work ongonig in render branch.

##### #4 - 2009-03-21 09:38 AM - Paolo Cavallini

What is the current state of this?

##### #5 - 2009-07-12 08:08 AM - Giovanni Manghi

Hi all,

regarding the description of this ticket my opinion is that this problem is fixed.

But the title does not make a lot of sense to me, as does not the first comment.

If we stay with the description I would close this ticket.

Leave feedback.

**#6 - 2009-07-18 04:08 AM - Giovanni Manghi**

- *Resolution set to fixed*

- *Status changed from Open to Closed*

I close this as the the original problem seems to be resolved and for lack of feedback. Reopen if necessary.
